

Our Company Values

Together, We Thrive

At the heart of what we do, it's not just about creating products—it's about building lasting partnerships. Success here isn't about doing it alone or playing it safe; it's about teammates who support each other, celebrate wins, and take bold steps together.

Sustainable Excellence

We don't just meet today's standards—we set tomorrow's. Committed to excellence, we challenge the status quo and never settle for "good enough." By prioritizing safety, efficiency, and continuous improvement, we're not just building quality products—we're shaping a more sustainable future.

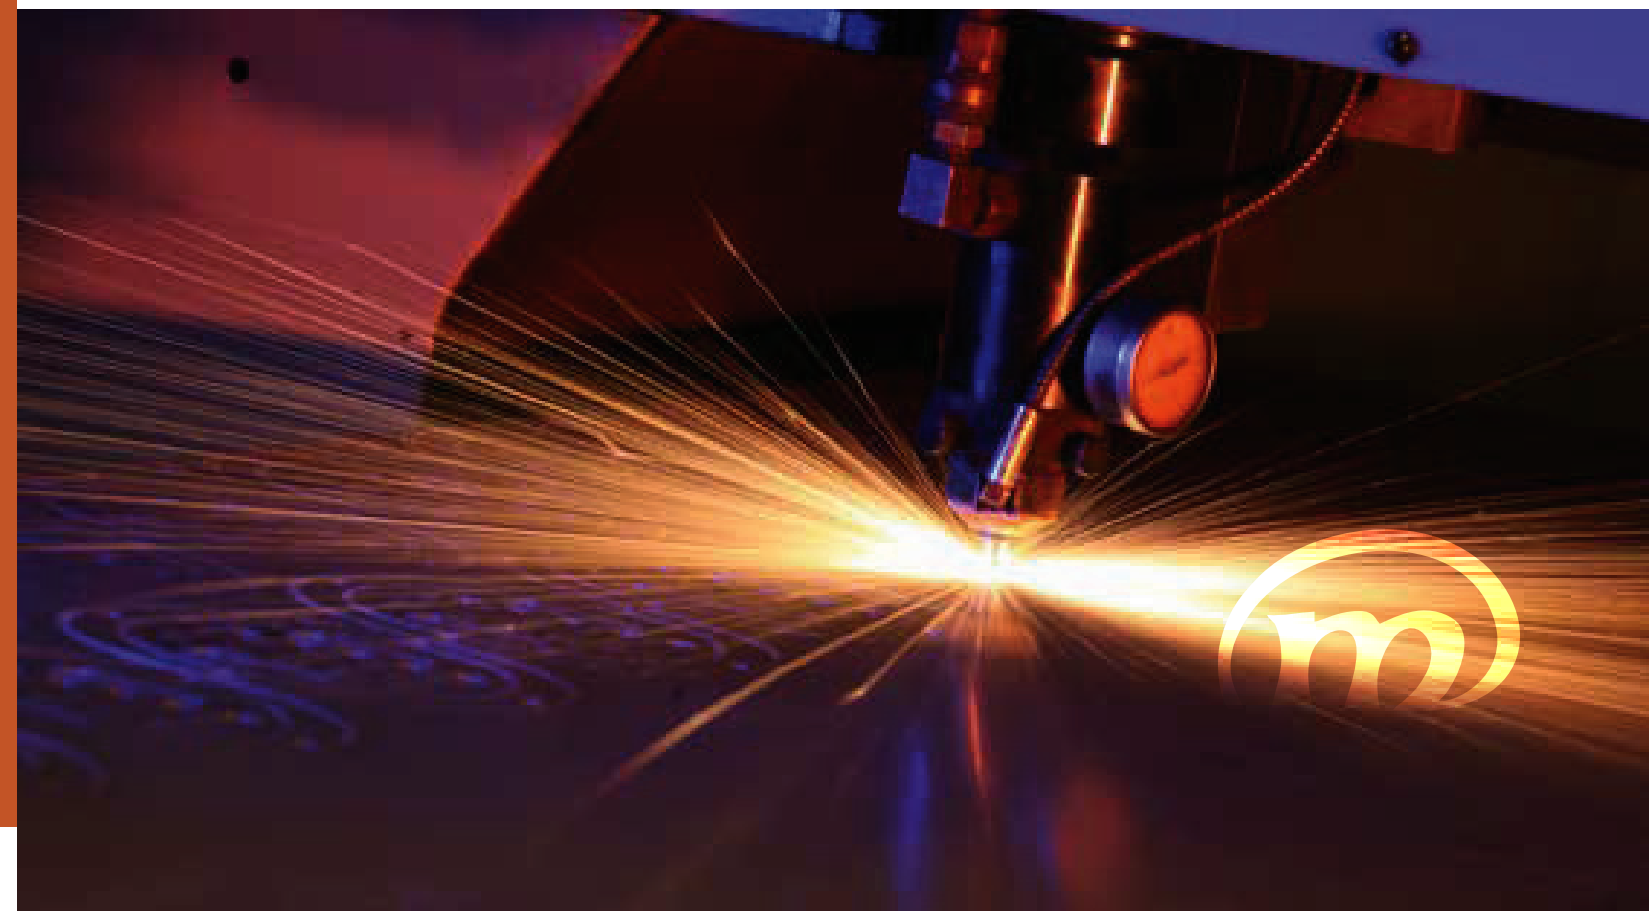

Customer Success Champions

We don't wait for customers to come to us with problems—we see their needs coming and jump into action. Our success is tied to theirs, so quick turnaround isn't just about speed; it's about providing thoughtful, complete solutions that exceed expectations.

Quality Assurance

At Monti, Inc. we do not want to only supply quality product, we want to be your quality supplier. Monti, Inc. utilizes a quality system that encompasses the whole business operation. Monti, Inc. is an ISO 9001:2015 registered company that has adopted a process based approach to managing the system by identifying the key support processes, defining internal customers, establishing metrics with goals, and monitoring the performance against those goals. This initiative takes a very data-driven, methodological approach to eliminating defects with the aim of satisfying our external customers by continuous improvement efforts.

Our purpose is to help you

POWDER COATING

What can Monti do for you?

Here's what we did for them!

- Rapid Prototyping
- Repair/Retrofit
- Reverse Engineering
- Design for Manufacturability
- Low to High Volume Production
- Value Add Assembly/Kitting
- 200,000 sq. ft of Manufacturing Space
- Expedited Delivery Options
- Reverse Engineering
- Partnerships (LTA/Stocking)
- Emphasis on reducing part costs

Sheet Metal Fabrication

- Laser cutting 60" x 120" sheet size capability with 24/7 lights out cutting
- State of the art forming equipment for speed and accuracy
- Both manual and robotic welding (Mig + Tig)
- Waterjet cutting (3, 4 axis)

Die Design/Build + Stamping

- Presses ranging from 35-440 tons for small quantity to large run production
- Staff with over 190 years of combined experience in designing and building tools
- Hand transfer + progressive dies with coil feed capabilities

CNC Milling + Turning

- Vertical + Horizontal machining centers (3, 4, 5 axis)
- Robotic loading/unloading for lights out production
- Turning capabilities include 2, 3, 5, 7 axis capabilities
- 12' magazine bar feeders for unattended production

Finishing

- Rohs/Reach compliant
- Zinc electroplating (clear + yellow)
- Powder coating
- Heat treating
- Anodizing

Please describe your relationship with Monti, Inc and your account manager.

Teamwork: Tom Mueller and the Monti Engineering/Production staff work as a team both internally and with the customer. I feel that I can trust Monti to provide a quality product at a fair price and NOT misrepresent their capabilities.

What is the quality and service you expect from Monti (both before and after this project)?

I expect a contract fabricator to honestly communicate their capabilities and capacities during the quotation stage and to follow through into production with a product that conforms to specifications.

What was the original idea presented for GMi's Stroll Frames? Monti was presented the opportunity to improve an existing design that was both not repeatable and not economical to produce.

How did Monti help to create the final product? Monti collaborated with GMi to improve the quality of Stroll frames by employing different fabrication and gaging methods to ensure that the parts were assembled squarely, within tolerance and on schedule.

– David Potter

David Potter, a development engineer with GMi companies,

was frustrated by the extensive production times to create their aluminum dry erase frames. After seeing the outstanding fabrication work Monti, Inc. had produced throughout their two-and-a-half-year partnership, David wondered if the local manufacturer was able to fix this process. Monti's team of engineers suggested switching to steel and utilizing a direct production process of lasering, forming, and welding. This new-and-improved process saved a significant amount in material costs and increased GMi's assembly production by 150%. David and his team at GMi trusts Monti to provide a quality product at a fair price and to not misrepresent their capabilities.
